Top 25 PSGallery Contributors

This is a report of contributions to the [PowerShell Gallery](#) from the top 25 module authors. This list excludes major vendors such as Microsoft, Amazon, and VMware. The exclusions are completely subjective. The intent is to use this report to highlight *individual contributors* to the PowerShell Gallery.

This report does not include pre-release modules and be aware that not every module will have an online repository.

Internal navigation links may not work in the PDF version of this report.

- **SqlStig 0.1.0.2** - Configures all of the settings required by the SQL 2014 Draft STIG excluding the Logon Trigger requirement (I find this to essentially break everytime) and TDE.
  Run both the Set-SQLInstanceStigItems and Set-SQLDatabaseStigItems to completely STIG the Instance.
  Requires some prior setup for SQL Agent Operators and Windows and/or Local Groups. [*03/04/2017 04:36:40*]
- **InstallExchange 1.0.0.9** - This module automates the installation of Exchange 2013 or 2016 including retrieving installation media, installing prerequisites, and post configuration tasks.
  To get started, download and unpack the Exchange 2013 or 2016 installation media to a directory on the server (which should be domain joined already) or use the Get-ExchangeInstallationMedia cmdlet. This will be the SourceDirectory parameter for Install-Exchange.
  Then run the Install-Exchange cmdlet with the necessary parameters. [*03/04/2017 04:24:01*]
- **ESAE 0.0.0.22** - Builds a secure ESAE Forest from which to manage other AD Forests. Can also be used to build a standalone secure forest. Includes all DISA STIGs as GPOs for Windows 8.1, Server 2012 R2, and more. [*03/03/2017 20:22:36*]
- **ActiveDirectoryStig 1.0.0.9** - Contains functions to set Active Directory STIG requirements that are not configurable through a GPO. [*03/03/2017 16:46:28*]
- **DnsStig 1.0.0.9** - Automates completing the Windows Server 2012 DNS STIG. Does not include DNSSEC related checks. [*03/03/2017 15:38:26*]
- **AssetInventory 1.0.1.6** - Collects asset information including software inventory, windows updates, and system information. [*01/19/2017 03:14:25*]

- **[Find-CrimeUK 1.2](#)** - Helps you locate all the crime that has happened in a particular place in the UK. As long as the police have recorded it and it has been registered on this API then it should show you the information about the crime. [*08/18/2022 14:37:45*]
- **[New-Avatar 1.0.0](#)** - This is just a fun module, it will not boost your career path using this, but it is cool, so I thought I would make it into a module. This uses the robohash.org API site which will allow you to generate either a robot, or a monster, or a robot disembodied head or finally a kitten. Based on the name you supply robohash.org [*08/15/2022 21:22:20*]
- **[Search-Dictionary 1.0](#)** - This uses dictionaryapi.dev to obtain the information displayed to you. To my knowledge no dictionary checkers are available as a module on the Powershell Gallery, due to my fondness of the English language and always looking for the most appropriate word to use, I thought creating a module to do just that would be a jolly good idea. This will return the definition of the word, an example of using the word, an audio clip of the phonetics of the word and finally a web link to wiktionary.org to find out even more information on this word you search for. Not every result contains examples and audio. [*08/15/2022 14:09:00*]
- **[New-ShortURL 1.0](#)** - The one and only Powershell short URL generator. This is using an API which is limited to 100 calls per minute. Allows you to turn a full url into a short url in a jiffy. [*08/14/2022 21:53:03*]
- **[Find-Geolocation 1.0.0](#)** - This module is using https://freegeoip.live API which is free. Yes. It's totally free. They believe that digital businesses need to get such kind of service for free. Many services are selling Geoip API as a service, but they think that it should be totally free. Feel free to their API as much as you want without any limit other than 10,000 queries per hour for one IP address. I thought this would be another good addition to add to the Powershell Gallery. [*08/13/2022 22:44:17*]
- **[Get-SecurePassword 1.0.2](#)** - A Powershell Binary wrapper for the Password Generator which has 1.8 million downloads, can now be run as a Powershell cmdlet https://www.nuget.org/packages/PasswordGenerator generating super secure OWASP standard. [*08/12/2022 22:39:02*]

- **Prism 0.6.0** - Prism is a PowerShell module manager inspired by NuGet. Run prism install in a source code repository, and Prism will save private modules into a "PSModules" directory in that repository. Prism let's you:
- Package and deploy modules side-by-side with the app or tool that uses them without needing to install modules globally ahead of time.
- Not worry about what modules are or aren't installed. Scripts can import and use modules from the "PSModules" directory in the script's source code repository.
- Avoid comitting modules to the source code repository. Team members and build processes run prism install to get modules installed. [*08/08/2022 19:34:10*]
- **Carbon.Core 1.1.0** - Functions that make doing things in PowerShell a little easier. We think these should be part of PowerShell itself. Core functions that are used by other Carbon modules. [*07/26/2022 22:39:23*]
- **Rivet 0.13.0** - Rivet is a database migration/change management/versioning tool inspired by Ruby on Rails' Migrations. It creates and applies migration scripts for SQL Server databases. Migration scripts describe changes to make to your database, e.g. add a table, add a column, remove an index, etc. Migrations scripts should get added to your version control system so they can be packaged and deployed with your application's code. [*06/23/2022 16:41:43*]
- **Carbon.FileSystem 1.0.1** - The Carbon.FileSystem module currently only has one function, Get-FileHardLink, which is used to retrieve hard link targets. This fixes a breaking change from Windows PowerShell where the Target property is not populated in PowerShell Core when using Get-Item to retrieve a previously linked file. [*05/05/2022 20:19:04*]

- **Carbon.Windows.Installer 1.0.0** - The Carbon.Windows.Installer module is a Windows-only module that has functions for reading and installing Windows MSI files/packages, and for replicating Windows' "Programs and Features"/"Apps and Features" graphical user interface as objects and text.
Functions include:
- Get-CInstalledProgram: reads the registry to determine all the programs installed on the local computer. Returns an object for each program. Is an object-based and text-based version of Windows' "Programs and Features"/"Apps and Features" GUI.
- Get-CMsi: reads an MSI file and returns an object exposing the MSI's internal tables, like product name, product code, product version, etc. Let's you inspect an MSI for its metadata without installing it. Can also download the MSI file first. This function requires Windows PowerShell or PowerShell 7.1+ on Windows.
- Install-CMsi: installs a program from an MSI file, or other file that can be installed by Windows. Can also download the MSI file to install. This function requires Windows PowerShell or PowerShell 7.1+ on Windows.
System Requirements:
- Windows PowerShell 5.1 on .NET 4.5.2+
- PowerShell 6.2, 7.1, or 7.2
- Windows Server 2012 R2+ or Windows 8.1+ [*12/22/2021 22:36:31*]
- **NoOp 1.0.0** - A module that does no work that we can use in automated tests that interact with the PowerShell Gallery. [*11/22/2021 20:24:00*]
- **BuildMasterAutomation 1.0.1** - The BuildMasterAutomation module is a PowerShell module for working with BuildMaster web APIs. BuildMaster is an application deployment automation tool by Inedo software. This module wraps its web APIs in a PowerShell interface. It allows you to read and create applications, releases, packages, etc. If this module doesn't have a function for a specific API endpoint, it has generic Invoke-BMRestMethod and Invoke-BMNativeApimethod functions that take the pain out of creating the proper web requests.
